NPIC/R-870/64

This report supplements NPIC/R-157/63, which discusses the Dyatlovo MRBM Complex, previously consisting of two Type I and one Type II MRBM launch areas, together with a rail-to-road transfer point. 1/

The three Ruda Yavorskaya fixed field MRBM sites (Figures 1 and 2) are collocated in a level wooded area approximately 9 nautical miles (nm) southwest of Dyatlovo in the White Russian SSR. Fixed Field Site No 3, the easternmost site, was not present on KEYHOLE coverage of [REDACTED] and was

first observed on [REDACTED] Fixed Field Site No 1, the westernmost site, was not present on [REDACTED] and was initially observed on [REDACTED]

[REDACTED] Fixed Field Site No 2 was not present on [REDACTED] and was observed initially on [REDACTED]

Dyatlovo Launch Areas No 1, 2, and 3 were all initially observed in a completed condition in [REDACTED]. The launch areas are approximately 12 nm to the north-northeast of the fixed field sites.

FIXED FIELD SITE NO 1

This site (Figure 3) consists of two launch pad clearings and two probable launch pad clearings interconnected by a looped road pattern and oriented on an azimuth of approximately 240 degrees. The northern launch pad clearings are 415 feet apart, and the two probable launch pad clearings are separated by 510 feet. Adjacent

to each launch pad clearing and the probable launch pad clearing is a smaller clearing, each containing an unidentified object or structure. More distant from each launch pad clearing and the probable launch pad clearing are four clearings containing three probable structures each.

FIXED FIELD SITE NO 2

Fixed Field Site No 2 contains four launch pad clearings and one probable launch pad clearing interconnected by looped roads and oriented on an azimuth of approximately 230 degrees (Figure 3). The northern launch pad clearings are located 490 feet apart, and the separation of the two corresponding launch pad clearings to the south is 450 feet. The probable launch pad clearing is located to the south and is somewhat re-

moved from the four launch pad clearings of the site. Immediately adjacent to each launch pad clearing and to the probable launch pad clearing is a smaller clearing containing an unidentified object or structure. Four additional clearings are present, each near a launch pad clearing. These each contain three probable structures. The probable launch pad clearing does not have a similar clearing associated with it.

FIXED FIELD SITE NO 3

Site No 3 consists of four launch pad clearings on a looped road pattern oriented on an azimuth of approximately 240 degrees (Figure 3). The northern launch pad clearings are separated by 400 feet, and the southern launch pad clearings are 320 feet apart. Adjacent to the north-eastern launch pad clearing are three unidentified objects or structures, and four unidenti-

fied objects or structures are observed between the two southern launch pad clearings. At the eastern portion of the site is a large clearing containing four possible tent or building foundations, and adjacent to this clearing are two unidentified objects or structures. To the south of the site are two rows each containing multiple objects or structures.
